

## **Adobe® Premiere® Pro 2.0: Basic Video Editing**

### **Course Description**

You have probably shot video with a digital video camera, and maybe recorded audio clips. However, you now need to assemble the video, audio, and still images to create a video program. In this course, you will use Adobe® Premiere® Pro 2.0 to create a video program that combines video, audio, and still images.

### **Course Objective**

You will create a video program that combines video, audio, and still images, using Adobe Premiere Pro.

### **Performance-Based Objectives**

Upon successful completion of this course, students will be able to:

- assemble a sequence of media clips.
- edit a sequence.
- enhance a sequence with transitions, effects, and titles.
- work with audio.
- capture media.
- export a video.
